Did you know?

*Bees use floral qualities such as polarized light patterns, petal texture, temperature, humidity, and electrostatic charge to help locate flowers.

*Plants attract pollinators by offering rewards such as pollen, nectar and floral oils.

*Approximately 75% of all plant species depend on animal pollinators.

*Bees & other pollinators contribute \$29 billion annually to US farm income by pollinating 58 crops.

*Key pollinators are honey bees, native bees, flies, moths, as well as birds and some mammals.

Seasonal displays of color not only increase property value, residents' overall wellbeing, and add beauty to open space but assist in increasing the pollinator populations by planting varieties included in all the top picks.
